WASTEWATER TREATMENT & STORAGE TANKS

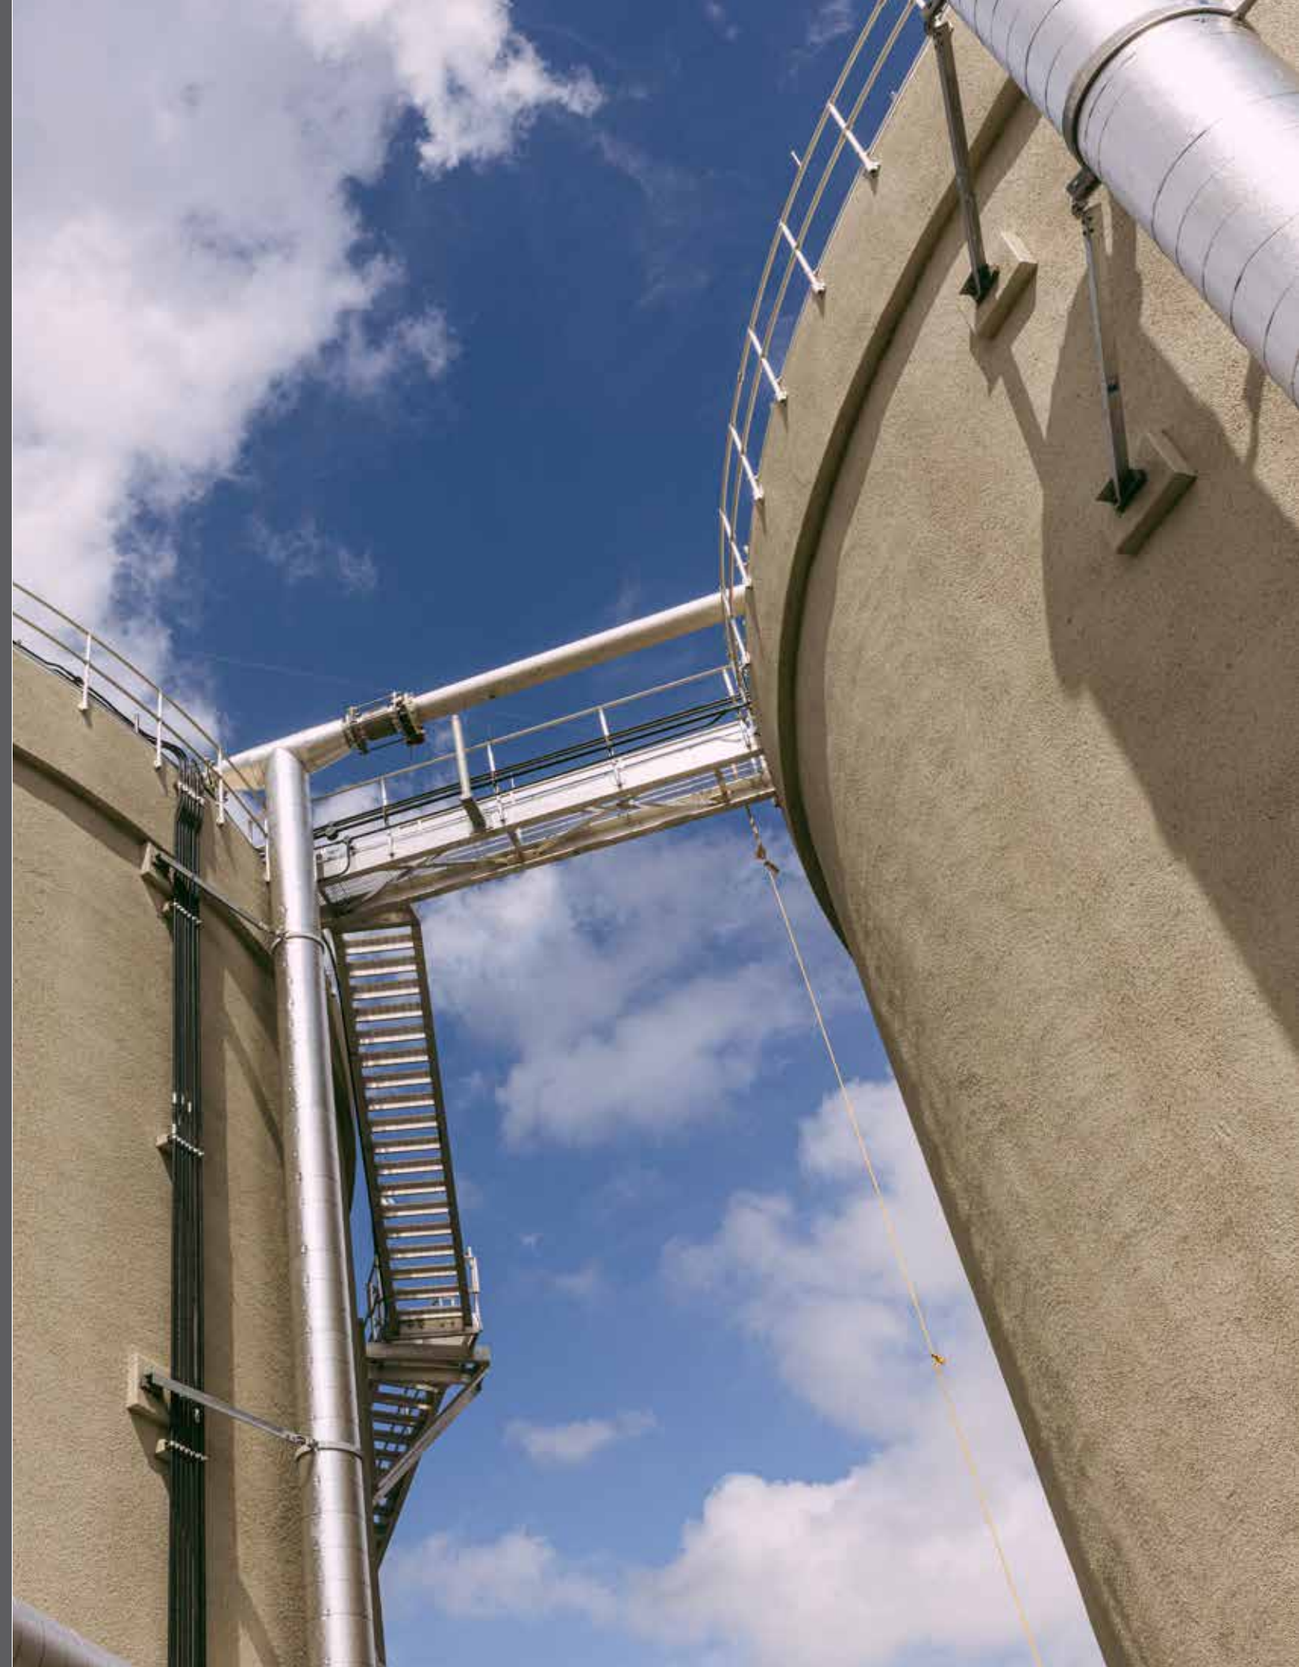
AWWA D110 Prestressed Concrete Tanks

THE RIGHT TANK IS ESSENTIAL TO YOUR WASTEWATER REQUIREMENTS

Few infrastructure questions are more important to a community than how it will manage its wastewater. This isn't simply something that DN helps clients accomplish, it's a priority that we've put at the heart of our vision – to keep the world's most precious resource safe.

You'll find that our durable tanks are equal to the rigorous service requirements of wastewater. We draw on our depth of proven experience to design and build a wastewater storage solution that best fit your needs. Building on the time-tested functionality of our AWWA prestressed concrete tanks, we use our customization capabilities to adapt to the specific conditions of your project.

Since 1929, DN has been building for the future with liquid storage tanks that deliver the highest overall long-term value. Once constructed, our tanks require little to no maintenance as they continue to perform for generations to come. Equally important, you gain a collaborative relationship where help, expertise, and the ability to implement are no further than a phone call away.



YOUR BEST CHOICE: DN AWWA D110 PRESTRESSED CONCRETE WASTEWATER TANKS

- **Tank Capacities** — from 40,000 gallons to 50 million gallons (MG) and more.
- **Custom Dimensions** — liquid heights from 8’ to over 100’ and diameters from 25’ to over 500’.
- **Siting Options** — at grade, partially buried, differentially back-filled, fully buried (with multi-use capabilities).
- **Seismic Resilience** — designed with an anchored flexible base for enhanced ductility and seismic performance.
- **Durability** — proven reliability through weather extremes, including fire and freeze thaw events, tornadoes and hurricanes.
- **Tank Cleaning** - Incorporate automated washdowns, flushing with troughs or water cannons.
- **Prestressed Wall Compression** — provides longevity, durability and liquid tightness.
- **Floor options** - Hopper floors, sloped floors, or flat floors to accommodate any of your process needs.
- **Reinvesting in the Local Economy** — use of materials, labor and equipment from within the community.
- **Wastewater Expertise** — tanks are custom designed by DN, along with the owner, consulting engineer and equipment manufacturers to meet your specific process design requirements. Request a lifecycle cost analysis today.
